

Display the last 2 users' information from "/etc/shadow" file:

```
sudo tail -n 2 /etc/shadow
```

---

Copy "history" file and "Games" directory from your home directory into Paul's home directory:

```
cp ~/history ~/Games /home/paul/
```

---

Delete the "history" file from Paul's directory:

```
rm /home/paul/history
```

---

Change Paul's "other" parameter to "computer science" and "Work phone" parameter to "0123456789" using one command:

```
sudo usermod -c "computer science,,0123456789," paul
```

---

Switch to root user:

```
sudo su
```

---

As root user, change the password of user "kim" to "kof2000":

```
[Not sure about this one] echo "kim:kof2000" | sudo chpasswd
```

---

Add user "kim" into Paul's group:

```
sudo usermod -aG paul kim
```

---
